

ONWO HIGH SPEED GREASE 2

Raj Petro Specialities Pvt. Ltd. offers a premium synthetic high speed grease with technology from UK for high speed CNC machine spindles which operate upto 12,00,000 Dmn value.

ONWO High Speed Grease 2 is a blend of synthetic base oils with friction reducing additives. The product is trusted by Major Textile & Auto Component manufacturers.

BENEFITS OF ONWO HIGH SPEED GREASE

- It provides excellent performance at low operating and start up temperatures.
- Low viscosity base oil and additive package offers excellent lubricity even at high speeds.
- Lower friction when operating therefore lower running temperatures.
- Quiet running and suitable for silent running electric motors.
- Extremely good protection against corrosion in wet / humid environments.
- The synthetic base oils offer longer Grease life.
- Compatible with bearing seal materials like NBR, FKM, PTFE etc..

The High Speed grease is recommended for high speed applications in machine tools, Textile Industries, small electric motors in medical & dental equipment etc.

ONWO High Speed Grease 2 is available in 100 Gms tube & 1, 3, 18 Kg packs.
